Content and organisation of the web page was discussed.

Glossary terms on learning were perfected, to contribute to top level glossary.

Content and scope of the citizenship glossary was discussed.

Known resources and practices were discussed and theoretical background recognised as inadequate and non centred.

Through discussion the “golden triangle” focus on volunteering – learning – citizenship was analyzed as to its value components and impact.

The group decided to organise a collection of practices where learning citizenship through volunteering can be observed. This can be used as practice bank, a basis for confrontation with other colleagues and a standardised terrain for further discussion and content observation.

A template for practices registration was devised, discussed and perfected on one concrete example. A list of practices to be contributed among group members was defined.

The sub-group also discussed: general project results, news and next steps; workshop preparation for the Lille network meeting; preparations for 2011 European Year of Volunteering. The sub-group also familiarised with the work of Observatori and was briefed on the situation of networks and current challenges of Catalan volunteering.
